Protecting your business

Discover the Evo Edge

Founded in 2014, Evo Fire & Security are dedicated to safeguarding businesses, protecting lives, and securing properties. Driven by a steadfast commitment to excellence, innovation, and a deep understanding of our clients' unique needs.

Proud to be independent, our expert customer support teams operate across the South West and are more than just service providers. Our independence is our strength, enabling us to focus solely on what matters most – your safety & security.

At the heart of Evo is our passion for technical innovation, merged seamlessly with our flair for creating bespoke solutions. We understand that every client is unique, and so are their needs. That's why we offer personalized, commercially competitive solutions that make us the integrator of choice for:

Fire Detection &
Life Safety Systems

Security Systems

Service Support
& Maintenance

Our Services

With over 20 years of experience in the industry, Evo is able to offer customers a comprehensive service tailored to all requirements, whilst maintaining competitive pricing. We specialise in the design, supply, installation, commissioning and maintenance of:

- > Fire Detection Systems
- > Fire Risk Assessments
- > Disabled Refuge Systems
- > PAVA Systems
- > Intruder Systems
- > Access Control
- > CCTV Systems
- > Fixed Suppression
- > Emergency Lighting

Providing for the private and public sector, in commercial, educational, industrial and leisure. We have delivered on notable projects including Ashton Gate Stadium redevelopment, Metrobank Bristol, Bath Spa University Estate and Bottle Yard Studios.

We design, supply, install, maintain and commission all leading market products, open and closed protocol systems, which distinguishes Evo from other independent fire and security companies. Moreover, we are Safe Contractor approved and have obtained full FIA and BAFE accreditation, which means we operate under the BAFE SP203-1 scheme for auditing purposes.

From engineers to directors, accounts to project managers, we are passionate about providing an outstanding service to our customers, to ensure that we only enhance the excellent reputation we have earned within the industry to date. We understand the importance of reliability, accountability, innovation and customer satisfaction, and these values define how we operate.

In an organisation of our size, it is the absence of calls and emails from schools about problems & concerns they may have which speaks volumes about the quality of a service you are receiving. The mobilisation of our contract went extremely smoothly due to Evo's flexible and understanding approach to our individual sites. We know that our Fire & Security services are in safe hands. This a perfect example of a well-run and effective service contract.

Partnership

Our Clients

■ We have been working with Evo Fire & Security now for many years and we have been impressed with their professionalism and service. Being a multi-site contract, the biggest difference we have noticed since selecting Evo is the efficiency in which we can now get things done, we have a single contract and a single point of contact! This has had a positive impact on our business and as such we have managed to free up time and look at making the important improvements on all our systems. It is the partnership we were hoping for.

Darren Gillespie - Facilities Manager

■ Evo replaced four separate contractors across three sites, bringing intruder, fire, security and access control under one company. The team is very knowledgeable and a pleasure to work with. They are always quick to respond and always go out of their way to make sure we get what we need. I have no problem recommending them.

Patrick Lawton - Area Manager

■ Evo have always provided a first class service that a customer would expect from a national company, but being local, can deliver complete and knowledgeable solutions to all of our requirements with familiarity and experience.

Janet Gilhespy - Facilities Manager

■ Working with Evo Fire and Security has more than halved our admin time on issues related to maintaining our fire and security systems. Servicing is done on time and always thorough, we are also able to talk through any issues directly with their engineers. Call out charges are very competitive compared with other providers. Evo are always responsive, some issues being able to be sorted with just a phone call to an engineer.

Barrie Fowler - Head of Facilities

Our People

The backbone of Evo's continued success is the dedicated team of technical Installation & Service Engineers, ably supported by our highly experienced Management, Sales, and Customer Service team.

Evo are extremely proud of our Apprenticeship Scheme, which has seen several of our existing engineers successfully graduate from the scheme to full-time, permanent employment with the Company. The scheme is a fundamental part of Evo's long-term business strategy and several Apprentices have already enrolled onto the scheme in recent years.

Moving forward the Apprenticeship scheme will continue to go from strength to strength, providing Evo with a sustainable chain of highly qualified and professional engineers, developed and nurtured in our professional culture.

Evo are a consistently good company to work alongside. From tendering to delivery of projects, all aspects are well looked after. A great standard of work and fantastic attitude by all its employees.

Case Study

Bristol Water

Evo has been providing preventive maintenance for Bristol Water's fire detection systems across 46 sites since January 2020. Our team of experienced engineers have carried out regular maintenance checks, modifications, and upgrades to ensure the systems are compliant with BS5839-1:2017. Coordinating maintenance and call-outs across such a large number of sites was a challenge, but our team developed a streamlined system to effectively manage the workload and meet Bristol Water's needs. We were also called upon for reactive call-outs and were able to respond quickly and efficiently to minimize downtime.

We have been working with Evo Fire & Security now for many years and we have been impressed with their professionalism and service. Being a multi-site contract, the biggest difference we have noticed since selecting Evo is the efficiency in which we can now get things done, we have a single contract and a single point of contact!

This has had a positive impact on our business and as such we have managed to free up time and look at making the important improvements on all our systems. It is the partnership we were hoping for.

Case Study

Leonardo Helicopters

Leonardo Helicopters, a renowned aerospace company, required a comprehensive fire alarm solution to upgrade the fire detection systems across 20 buildings at their headquarters in Yeovil. Evo Fire & Security, a leading provider of fire and security solutions, successfully won the tender to execute this challenging project. Evo Fire & Security's project involved the installation of new addressable fire systems to the PI/M category, which required meticulous planning and execution. The complexity of the buildings, site processes, and time restraints posed significant challenges that had to be overcome to ensure successful delivery.

The hard work undertaken has paid dividends in the reduction of planned installation timescales for multiple large buildings. Evo has been consistently reliable every step of the way. As our site has complex manufacturing facilities, Evo has had to adapt its approach to deal with an incredibly demanding environment, which was achieved with ease.

With such a large-scale project running smoothly over the last nine months; we are pleased to have built such a good working relationship with the team.

Sabrina Kerley

Site Facilities Project Engineer
Leonardo Helicopters

LEONARDO

Case Study

Parkwood Leisure

A trusted partner of Parkwood Leisure, providing preventative maintenance for fire, public address voice alarm, intruder, CCTV, and access control systems at Hengrove Leisure Centre since 2020. Evo has been responsible for ensuring that all systems are in optimal condition, including maintenance, modifications and upgrades. One of the major achievements of Evo and Parkwood Leisure was the CCTV upgrade project. The project involved the design, installation, and commissioning of a new Hikvision site-wide networked CCTV system throughout the leisure centre and multi-story car park. The installation process was carried out with minimal disruption to the leisure centre's operations, and the system has been functioning seamlessly since its commissioning.

Evo replaced four separate contractors across three sites, bringing intruder, fire, security and access control under one company.

The team is very knowledgeable and a pleasure to work with. They are always quick to respond and always go out of their way to make sure we get what we need. I have no problem recommending them.

Cushman & Wakefield

Evo has been providing fire and security services to Cushman & Wakefield, a leading commercial development company, for a number of years. Our partnership with Cushman & Wakefield started with the maintenance of their main Bristol Harbourside commercial development. Since then, we have been working closely with their team to provide fire and security services throughout the Southwest region. We have completed a range of projects for Cushman & Wakefield, including intercom upgrades, CCTV installations, fire detection system alterations, access control additions, and intruder alarm works. Our goal is to provide Cushman & Wakefield with a comprehensive fire and security solution that meets their needs and exceeds their expectations.

We have been working with Evo Fire and Security for the past 5 years, and have always found them to be a knowledgeable, professional, easy-to-deal-with outfit.

Nothing is too much trouble for them and they reliably deliver our maintenance and installation requirements.

Cushman & Wakefield

Case Study

LiveWest Bristol Foyer

In February 2023, Evo was presented with a high-profile project by LiveWest. Their mission: to design, install, and commission a state-of-the-art Paxton access control system at Bristol Foyer, a vital housing facility for vulnerable young people in the heart of Bristol. A considerable challenge was the need to maintain a high degree of project management and rigid adherence to a strict program of work. Evo's task involved transitioning from traditional keylocks to access control on all bedroom doors, a significant operational shift that required meticulous planning. The team ensured that no bedroom was left unsecured at the end of each shift, and thanks to their rigorous planning, adaptability, and dedication, Evo not only successfully completed the upgrade but did so ahead of schedule.

From the initial pre-start meeting Evo provided us with confidence, this evolved throughout the project and due to efforts of the installers and management at Evo, the project was a complete success from start to finish. We had a couple of issues and design changes throughout, which were dealt with efficiently and effectively by the Evo team. I am pleased to have Evo on board as an approved contractor and look forward to working with them in the future.

Bristol City Football Club Stadium Redevelopment

The installation of the fire detection system, disabled refuge system and stewards phone system for the phased upgrade of the South, Lansdown and Dolman standards at Bristol's Ashton Gate Stadium, providing a fully networked system linking back to the main security office for system control and operation on matchday.

I can highly recommend the installation team at Evo. This was a challenging project with high profile deadlines to be met, and Evo delivered.

ASHTON GATE

Case Study

Old Vic Theatre Anniversary Works Project

Automatic fire detection system, full rewire and upgrade of the original redundant system in line with the two phases of front and back of house works, re-designing the system to meet the new premises internal layout. Aspirating detection systems installed throughout the theatre auditorium, interfaced in to the house detection system. A complete new disabled refuge and toilet alarm system, networked between front and back of house across two phases of works.

Having worked with Evo on several prior projects, we were delighted to have them onboard for the fire detection systems, knowing we could trust their delivery.
